

JESHIKO J

DevOps Engineer & Cloud Architect

Kanyakumari, Tamil Nadu | +91-7395881571 | chandranjeshiko@gmail.com
linkedin.com/in/JeshikoJ | github.com/jeshikoJ | jeshikoJ.github.io

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer and Cloud Architect specializing in AWS infrastructure automation, CI/CD pipeline design, and system reliability engineering. Proven track record reducing deployment times by 70%, eliminating 60% of environment-related bugs, and maintaining 100% data integrity across production workloads. Proficient in Terraform, Ansible, Jenkins, Docker, Kubernetes, and AWS architecture.

EDUCATION

Bethlahem Institute of Engineering

Graduated May 2025

Bachelor of Engineering (B.E.) in Computer Science & Engineering

- **Relevant Coursework:** Database Systems, Cloud Computing, Software Engineering, Linux Administration

TECHNICAL SKILLS

Cloud & DevOps:

AWS (EC2, S3, IAM, Lambda, VPC, RDS, CloudFormation, ECS, EKS), Linux, Terraform, Ansible, Docker, Kubernetes, Helm, Auto-scaling, Multi-region

CI/CD & Automation:

Jenkins, GitHub Actions, Git Workflows, Automated Testing, Blue-Green, Canary, Rolling, Zero-downtime Deployment

Monitoring &

Security:

CloudWatch, Prometheus, Grafana, System Reliability Engineering (SRE), Security Groups, IAM Policies, VPC Architecture

Development:

Python (Django, Flask), JavaScript, Node.js, React, PostgreSQL, MongoDB, Query Optimization, Multi-AZ Deployments, Database Replication

PROFESSIONAL EXPERIENCE

Crescent Infotech

Aug 2024 – Sep 2024

Artificial Intelligence Intern

- Architected and executed SDLC from requirements gathering to production deployment on AWS EC2, achieving a 30% reduction in operational overhead.
- Engineered resilient database schemas ensuring 100% data integrity and optimized CRUD application operations.
- Orchestrated secure cloud infrastructure using IAM roles, Security Groups, and network VPC segmentation.

NoviTech R&D Pvt. Ltd.

Jun 2023 – Jul 2023

Web Development Intern

- Engineered 5+ fully responsive web applications utilizing HTML5, CSS3, and JavaScript frameworks in strict alignment with WCAG accessibility standards.

PROJECTS

Restaurant Ordering Platform

Node.js, GitHub Actions, Docker, Vercel

- Architected serverless API layers achieving a 40% latency reduction; implemented automated GitHub Actions CI/CD pipelines for zero-downtime deployments and containerized environments via Docker to eliminate 60% of configuration bugs.

Full-Stack E-Commerce Infrastructure

Django, PostgreSQL, AWS EC2, Docker

- Engineered secure AWS network architecture utilizing granular IAM policies and multi-tier VPC segmentation; slashed deployment overhead by 70% while maintaining 100% transaction integrity.

Automated Jenkins CI/CD Pipeline

Jenkins Master-Slave, Ansible, Docker, AWS EC2

- Designed an end-to-end Jenkins master-slave pipeline automating code compilation, integration testing, containerization, and target deployment; integrated GitHub webhooks and Ansible for configuration management.

KEY ACHIEVEMENTS & METRICS

- Reduced software deployment time cycles by 70% through Jenkins CI/CD automation to facilitate rapid daily feature releases.
- Achieved a 40% optimization in API response latency utilizing serverless computing patterns and raw query optimizations.
- Eliminated 60% of environment-specific deployment failures via standardized Docker containerization strategies.
- Maintained a 100% consistent data integrity metric across critical payment gateway and inventory system transactions.
- Designed enterprise-grade multi-tier AWS infrastructure blueprints featuring strict least-privilege identity access controls.
- Implemented highly resilient continuous deployment workflows yielding a verified 99.5% pipeline success rate.

CERTIFICATIONS

- **DevOps Fundamentals** – IBM Developer Network / SLA Institute (Course CD0115EN)
- **Python Full Stack Programming** – E-Max Education (Grade A+, 86%)
- **Artificial Intelligence Training** – Crescent Infotech
- **Interaction Design & Prototyping** – Feather Softwares
- **Web Development Internship Certification** – NoviTech R&D
- **Data Science using Python** – VEI Technologies

CORE COMPETENCIES

AWS Cloud Architecture • Infrastructure-as-Code (Terraform, Ansible) • Containerization & Orchestration (Docker, Kubernetes) • CI/CD Automation • Linux Administration • Git Workflows • System Reliability Engineering (SRE) • Cloud Security Best Practices • Database Performance Optimization • Agile/Scrum Methodologies
